Subject: Animas call notes 8/8

OSCs at mine site. Water treatment is operational at constructed site holding ponds. Water still leaking at 740 gpm from adit but EPA treating further discharge. Clearing observed but rain expected and more turbidity expected as well.

Fish cages deployed by co parks and fish. 96 hour tox report. Tissue sampling later coordinate w IC.

Sampling Crews at river and DW wells in CO. Some well water is orange. EPA is providing Bottled water 1 tank and livestock tank. Irrigation issues are emerging.

Water Sampling plan is being prepared. Deb McKean from R8 is helping and providing screening criteria. Sediment sampling for fields and river is being requested. Approximately 700 wells win 1000 feet of river. Data process. RAs and congressional stream lined data sharing.

Deploying start and ERT Durango w SERAS. Aspect monitoring leading edge currently. Public posting of information will be on a epaosc website. Region 8 will post all info to epaosc website. Will create a public side including map

Farris.Laura@epa.gov will be included on regional sit reps and updates.

R6 staffing
